

A MODEL OF “INTEGRATED SCIENTIFIC METHOD”  
AND ITS APPLICATION FOR THE ANALYSIS OF INSTRUCTION

by  
Craig F. Rusbult

A dissertation submitted in partial fulfillment  
of the requirements for the degree of

Doctor of Philosophy  
(Curriculum and Instruction)

at the  
UNIVERSITY OF WISCONSIN-MADISON  
1997

## TABLE OF CONTENTS

Abstract .....	i
Acknowledgments .....	iii
Table of Contents .....	iv
List of Figures and Tables .....	xiii
CHAPTER 1: An Overview .....	1
Introduction .....	1
Objective 1 .....	2
Objective 2 .....	3
Significance of the Research .....	7
CHAPTER 2: A Model of ‘Integrated Scientific Method’ .....	11
2.00: Goals for a Model of ISM .....	11
THE ISM FRAMEWORK .....	14
2.01: Empirical Factors in Theory Evaluation .....	15
2.02: Conceptual Factors in Theory Evaluation .....	17
2.03: Cultural-Personal Factors in Theory Evaluation .....	19
2.04: Theory Evaluation .....	20
2.05: Theory Invention .....	23
2.06: Experimental Design .....	25
2.07: Problem Solving, Thought Styles, and Thinking .....	28
A. Problem-Solving Projects .....	28
B. Thought Styles .....	30
C. Mental Operations .....	31
AN EVALUATION OF ISM AS A DESCRIPTIVE FRAMEWORK .....	32
2.08: Can ISM Describe a Wide Range of Views and Practices? .....	32
A. One Framework, Many Elaborations .....	32
B. Can ISM describe a wide range of views? .....	32
C. External Consistency and Retroductive Inference? .....	33
D. Cultural-Personal Influence? .....	34
E. Hypothetico-Deductive Reasoning? .....	35
F. Analysis and Holism .....	36
G. Can ISM describe a wide range of science? .....	37
H. Is ISM biased? .....	38
I. Can ISM cope with differences in terminology? .....	39
2.09: Is ISM a model for ‘scientific method’? (Part 1) .....	44

A. A Penchant for Patterns? .....	44
B. Skeptics about Methods .....	45
C. Does ISM try to describe a ‘method’ in science? .....	46
D. Is ISM a Model? .....	48
AN ISM ELABORATION .....	49
2.1: Empirical Factors in Theory Evaluation .....	50
2.11: System and Model, Predictions and Observations .....	50
A. Theories .....	50
B. Experimental System .....	50
C. Theory-Based Model of Experimental System .....	51
D. Model-Based Predictions .....	53
E. Experimental Observations .....	53
2.12: Hypothetico-Deductive Logic .....	54
A. Degree of Agreement .....	54
B. Degree of Predictive Contrast .....	55
C. Two Evaluation Criteria, and Multiple Sources of Data .....	57
2.2: Conceptual Factors in Theory Evaluation .....	58
2.21: Simplicity and Internal Consistency .....	59
A. Simplification .....	59
B. Systematicity .....	60
C. Simplicity .....	60
D. Internal Consistency .....	61
2.22: Conflicting Criteria .....	61
A. Simplification versus Completeness and Empirical Adequacy .....	61
B. Ad Hocness versus Inventive Revision .....	63
2.23: Constraints on Theory-Components .....	63
2.24: Description and Explanation .....	64
A. Is there an explanation for gravity? .....	64
B. Empiricism .....	66
C. Theories (descriptive and explanatory) in ISM .....	67
2.25: Cognitive Utility .....	67
A. Theory Structure and Cognitive Structure .....	67
B. Personal Thinking Styles and Communal Thought Styles .....	69
2.26: Research Utility .....	70
A. Acceptance and Pursuit .....	70
B. Evaluation Criteria for Immature Theories .....	71
C. Ideas for Experimental Design .....	72
D. How a ‘False Model’ can be Useful .....	73
E. Useful Functions of Simplification .....	73
2.27: External Consistency .....	76
A. Overlapping Domains and Shared Components .....	76

B. A Shared Domain, with Competitive Theories .....	77
C. A Shared Component (with inconsistency) in Different Domains .....	78
D. A Shared Component (with consistency) in Different Domains .....	80
E. Component or Conclusion? .....	81
F. Conceptual or Empirical? .....	81
2.28: External Connections .....	82
A. Levels of Organization .....	83
B. Theories with Wide Scope .....	83
C. External Relationships viewed as Internal Relationships .....	84
D. Is a ‘grand unified theory’ a worthwhile goal? .....	85
E. Progressing from Description to Explanation .....	85
F. Unification as Consilience with Simplicity .....	86
G. A Narrowing of Domains .....	87
2.3: Cultural-Personal Factors .....	88
2.31: Five Types of Influences .....	89
A. Psychological Motives and Practical Concerns .....	89
B. Metaphysical Worldviews and Ideological Principles .....	89
C. Opinions of Authorities .....	90
2.32: The Social-Institutional Context of Cultural-Personal Factors .....	91
2.33: Mutual Interactions between Science and Culture .....	92
2.34: Personal Consistency .....	93
2.4: Theory Evaluation .....	95
2.41: Intrinsic Status and Relative Status .....	95
2.42: Responses to Theory Evaluation .....	96
2.43: Truth Status and Utility Status .....	97
2.44: The Limits of Logic, and Rationally Justified Confidence .....	101
A. Limitations of Hypothetico-Deductive Logic .....	102
B. Limitations of Observations .....	104
C. Limitations on Inductive Logic .....	105
D. Potential Problems and Actual Problems .....	106
2.45: Conflicts and Controversies .....	107
A. Empirical Factors and Conceptual Factors .....	107
B. Relativism .....	108
C. Realism and Instrumentalism .....	110
2.5: Theory Selection and Invention .....	112
2.51: Selection and Invention .....	112
2.52: Retroductive Logic and Empirically Inspired Invention .....	114
A. Timing .....	114
B. Purpose .....	115
C. Logical Limitations .....	115

D. Invention of a Domain-Theory or System-Theory .....	116
E. Multiple Empirical Constraints and Retroductive Induction .....	118
2.53: Conceptually Inspired Invention .....	119
A. Analysis-and-Revision .....	120
B. Internal Consistency .....	121
C. External Relationships .....	122
2.6: Experimental Design .....	123
2.61: Goal-Directed Experimental Design .....	124
A. Knowledge about Theories and Experimental Systems .....	124
B. Gathering Data in Early Stages of Development .....	125
C. Strategies and Principles for Experimental Design .....	126
D. Knowledge of Experimental Techniques .....	127
E. Anomaly Resolution .....	128
F. Predictive Contrast and Crucial Experiments .....	129
G. Heuristic Experiments and Demonstration Experiments .....	130
H. Experiments in Problem-Solving Projects .....	132
2.62: Taking Advantage of Opportunities .....	133
2.63: Thought Experiments .....	135
A. Thought Experiments and Physical Experiments .....	135
B. Four Types of Thought-Experiments .....	135
2.7: Problem Solving, Thought Styles, and Thinking .....	137
2.71: Problem Solving in Science .....	137
A. Problems .....	137
B. Problem-Solving Actions .....	138
C. Problem-Solving Projects .....	138
D. Action Evaluation .....	139
E. Private Evaluation and Public Evaluation .....	140
F. Preparation .....	140
G. Levels of Problem Solving .....	141
H. A 3Ps Model of Science .....	142
I. A Basic Theme with Variations .....	143
J. Interactions between Stages and Activities .....	144
K. Interactions between Levels of Problem Solving .....	145
2.72: Thought Styles .....	146
A: Definitions .....	146
B. Effects on Experiments and Theories, Goals and Procedural Styles .....	147
C. Two Metaphors: a Puzzle and a Filter .....	149
D. Problem Posing .....	151
E. Conflicts in Problem Posing .....	152
F. Preparation, Probing, and Persuasion .....	154
G: Variety .....	155

H: Conformity .....	155
I: Change .....	157
2.73: Motivation and Memory, Creativity and Critical Thinking .....	160
A. Motivation .....	160
B. Memory .....	161
C. Creativity and Critical Thinking .....	162
AN EVALUATION OF ISM AS A DESCRIPTIVE FRAMEWORK .....	165
2.8: Other Views of Scientific Method .....	165
2.81: Alternative Elaborations and Borrowed Ideas .....	165
2.9: Is ISM a model for 'scientific method'? (Part 2) .....	167
2.91: Description, Prediction, Explanation, Prescription .....	167
A. Description .....	167
B. Prediction .....	167
C. Explanation .....	169
D. Prescription .....	170
2.92: Is ISM a model for a method? .....	171
CHAPTER 3: An Integrative Analysis of a Problem-Solving Classroom .....	174
3.11: Selection of a Course for Analysis .....	175
3.12: A Classroom Context for Problem Solving .....	176
A. Effect-to-Cause Problems .....	176
B. The Classroom .....	177
3.2: Methods for the Analysis .....	180
3.21: Activities and Experiences in a Functional Analysis .....	180
3.22: An Overview of the Analysis .....	182
3.23: Major Instructional Activities .....	183
3.24: Creating a Classroom Atmosphere .....	186
A. Students as Scientists .....	186
B. Stories about Science .....	187
C. Metacognitive Reflection .....	188
D. Social-Intellectual Interactions .....	188
3.25: Genetics Problems in the Classroom .....	189
A. Genetics Construction Kit (GCK) .....	189
B. A Structured Representation of Mendel's Model .....	191
C. GCK Problems that require Model Revising .....	193
3.26: Science Experiences .....	195
3.27: Three Stages of Analysis .....	197
3.28: Sources of Information for the Analysis .....	198
A. Methods for the Central Activity .....	198
B. Methods for Other Activities .....	200

3.3: The First Phase of Analysis — Student Experiences in Each Activity .....	201
3.31: Activity Group #1 — Black Box Model Revising .....	201
A: Developing (building and revising) Models .....	201
B: A Student Conference .....	205
C: Revising Models .....	207
3.32: Activity-Group #2 — Genetics Phenomena .....	207
A: The Cookie Analogy .....	208
B: Human Variations and Human Pedigrees .....	208
3.33: Activity Group #3 — Initial Models .....	209
A: Developing a Mendelian Model .....	209
B: Developing a Model of Meiosis .....	211
C: GCK Problems without Model Revising .....	213
3.34: Activity Group #4 — Genetics Model Revising .....	215
A: GCK Problems that require Model Revising .....	215
B: Student Conferences .....	227
3.35: Activity Group #5 — Manuscript Preparation .....	228
A: Manuscript Writing and Manuscript Revising .....	228
3.4: The Second Phase of Analysis — The Structure of Instruction .....	235
3.41: An Introduction to the Second Phase of Analysis .....	235
3.42: Preparation by Learning Procedures .....	238
3.43: Preparation by Learning Concepts .....	238
A. Providing Conceptual Knowledge for Model Revising .....	238
B. Simplifying the Process of Analysis-and-Revision .....	239
C. Limiting What Students Know About Genetics .....	240
3.44: Posing Problems .....	242
A. Posing is done by the Teacher .....	243
B. Posing is done by Students .....	243
C. Do Students Pose Problems? .....	245
3.45: Adjusting the Level of Difficulty .....	246
A. Why Adjustments are Important .....	246
B. When to adjust? Before or During Problem Solving .....	247
C. The Teacher as a Source of Procedural Knowledge .....	247
D. The Teacher as a Source of Conceptual Knowledge .....	248
E. The Teacher as an Adjuster of Problem Difficulty .....	249
F. The Teacher as a Source of Emotional Support .....	249
3.46: Helping Students Learn from Their Experience .....	250
A. The Teacher as a Facilitator of Learning .....	251
B. Learning by Metacognitive Reflection .....	251
C. Learning from Other Students .....	252
3.47: Stories about Science and Scientists .....	253
A. Stories about Science: Strategies for Problem Solving .....	254

B. Stories about Science: Having Fun as a Scientist .....	255	vi
3.48: Functional Relationships in the Instruction .....	259	ii
A. Functional Relationships Within Activities .....	259	
B. Functional Relationships Between Activities .....	262	
3.5: Suggestions for Improving the Course .....	265	
3.51: Suggestions by Others .....	266	
3.52: My Suggestions for Improvement .....	268	
A. Supplementing Incomplete or Inauthentic Science Experiences .....	269	
B. Using ISM in Discussions of Problem-Solving Strategies .....	271	
C. Using Prediction Overviews .....	273	
3.6: Evaluating the ISM-Based Analysis .....	274	
3.61: Understanding the Structure of Instruction .....	274	
3.62: Testing and Improving the Analytical Utility of ISM .....	276	
A. Testing ISM as a Tool for Instructional Analysis? .....	276	
B. An Improved Understanding of ISM-Based Analysis? .....	278	
C. An Improvement in ISM as a Tool for Analysis? .....	279	
D. Using ISM as part of an Eclectic Analytical Framework? .....	280	
 CHAPTER 4: Potential Educational Applications for a Model of ‘Integrated Scientific Method’ .....	 282	
4.1: Using ISM for Instructional Design .....	282	
4.11: Aesop's Activities .....	283	
4.12: Analysis and Design .....	284	
4.2: Using ISM in the Classroom .....	287	
4.21: Learning from Experience .....	287	
4.22: Coping with Complexity .....	290	
4.23: Should Scientific Method be X-Rated? .....	292	
4.3: Using ISM for Teacher Education .....	296	
4.4: General Thinking Skills and a ‘Wide Spiral’ Curriculum .....	297	
4.41: A Model for an ‘Integrated Design Method’ .....	297	
4.42: A Wide Spiral Curriculum .....	299	
4.43: In Praise of Variety in Education .....	302	
4.5: An Overview of “ISM in Education” .....	304	
 REFERENCES .....	 306	
 APPENDIX		
A1: A Brief History of ISM-Diagrams .....	312	
A2: Controversies about Scientific Method .....	316	

A21: Logical Skepticism .....	316
A: Hypothetico-Deductive Logic .....	316
B: Theory-Influenced Observations .....	317
C: Extreme Solutions for Pseudo-Problems .....	317
A22: Empiricism .....	318
A23: Realism and Instrumentalism .....	322
A: The Flexibility of Critical Realism .....	322
B: Pros and Cons of Instrumentalism .....	322
C: Is there Scientific Progress? .....	324
D: Do Scientists Create Reality? .....	326
A24: Relativism .....	327
A. Motives for Relativism .....	328
B. Criticisms of Radical Relativism .....	330
A25: Tools for Analysis: Idealization and Range Diagrams .....	331
A. Analysis by Idealization .....	331
B. Analysis using Range Diagrams .....	333
B1: Prediction Overviews, and Potential Problem-Solving Actions .....	338
B10: A New Type of Representation: Prediction Overviews .....	338
A. A System of Symbols .....	338
B. A Prediction Overview for a Model of Dominance .....	339
C. Utility — Scientific, Instructional, and Analytical .....	340
B11: A Model for Round 1 — Codominance .....	341
A. Anomaly Recognition .....	341
B. A General Problem-Solving Strategy .....	342
C. Anomaly Resolution .....	342
D. Model Revising .....	343
B12: A Model for Round 2 — Multiple Alleles .....	343
A. Anomaly Recognition .....	343
B. Anomaly Resolution .....	343
C. Model Revising .....	345
D. Other Sub-Patterns for the Pattern of Multiple Alleles .....	345
B13: A Model for Round 3 — X-linkage .....	347
A. Anomaly Recognition .....	347
B. Anomaly Resolution .....	348
C. Model Revising .....	349
B14: A Model for Round 4 — Autosomal linkage .....	350
B15: A Prediction Overview for “3 Alleles per Individual” .....	363
B16: A Comparison of Three Symbol-Systems .....	363
B2: Actual Problem-Solving Actions .....	365
B20: Four Sources of Empirical Data for the Analysis .....	365

B21: An Overview of the Analysis .....	366
B22: An ISM-based Analysis of Problem-Solving Actions .....	370
A. An Overview of the Problem-Solving Process .....	371
B. Anomaly Recognition .....	371
C. Serendipity, Surprise, Alertness, Statistics .....	373
D. Connecting Anomaly Recognition with Anomaly Resolution .....	374
E. Anomaly Resolution by a process of Invention-and-Evaluation .....	375
F. Memory for Models .....	377
G. Conceptual Constraints on Thinking .....	378
H. Three Alleles Per Individual? .....	378
I. Protected Components .....	380
J. Conceptual Information from the Teacher .....	381
K. An Example of Conceptual Assistance .....	382
L. Combining Ideas in New Combinations .....	383
M. Key Factors in Successful Model Revising .....	385
N. Using Time: Observation and Interpretation .....	386
O. Theory Evaluation: Balancing Empirical and Conceptual Factors .....	387
P. Denial of Anomaly .....	390
Q. Evaluation based on Thought Styles and Complexity .....	391
R. Combining Perseverance and Flexibility .....	393
S. Observables and Unobservables, Logic and Patience .....	395
T. Retroductive Inference of Models and System-Theories .....	396
U. Descriptive Theories and Explanatory Theories .....	398
V. Testing Models: Experimenting and Evaluating .....	399
W. Goal-Oriented Experimental Design .....	400
X. Trial-and-Error with Fluent Speed .....	402
Y. A Story of Goal-Oriented Wandering .....	403
Z. Competition and Cooperation .....	404

## LIST OF FIGURES AND TABLES

xi

### In the Main Body:

Figure 1: A Visual Representation of "Integrated Scientific Method" .....	9
Figure 2: Relationships between Objectives A and B .....	11
Figure 3: Relationships between Objectives (1, 2, A, B) and Chapters 2, 3 and 4 .....	12
Figure 4: Four Possibilities for combining Truth Status with Utility Status .....	100
Figure 5: Timing Differences for Hypothetico-Deductive Logic and Retroductive Logic .....	115
Figure 6: Relationships between Levels of Problem Solving .....	145
Table 1: A simple Activity-and-Experience Grid .....	180
Figure 7: Computer Screen showing a Field Population and the progeny from Two Crosses .....	190
Figure 8: Mendel's Bible — an external representation for a model of simple dominance, in terms of Objects, States, and Processes .....	192
Table 2: Science Experiences, based on a model of 'Integrated Scientific Method' .....	196
Table 3: Science Experiences during the "Black Box Model Revising" activities .....	230
Table 4: Science Experiences during the "Genetics Phenomena" activities .....	231
Table 5: Science Experiences during the "Initial Models" activities .....	232
Table 6: Science Experiences during the "Genetics Model Revising" activities .....	233
Table 7: Science Experiences during the "Manuscript Preparation" activities .....	234
Table 8: Functional Relationships between and within Instructional Activities .....	236
Figure 9: A Visual Representation of "Integrated Design Method" .....	298

### In the Appendix:

Figure 10: Four diagrams, at different stages in the development of ISM .....	312
Figure 11: Two Types of Range Diagrams for "Politics in Science" .....	334
Figure 12: Frequency Graphs for "Politics in Science" (xfor imaginary analysis) .....	336
Figure 13: A Method for showing Approximate Frequencies (for imaginary analysis) ...	336
Figure 14: Unwarranted Implications occur if Examples do not accurately represent Population (for imaginary analysis) .....	337
Figure 15: An external representation for a model of simple <b>dominance</b> .....	354
Figure 16: Data and Theory for <b>codominance</b> in Round 1 .....	355
Figure 17: Data and Theory for <b>multiple alleles</b> in Round 2 .....	356
Figure 18: Data and Theory for <b>sex linkage</b> in Round 3 .....	358
Figure 19: Data and Theory for <b>autosomal linkage</b> in Round 4 .....	359
Figure 20: A Super-Punnett Overview for a "3 alleles per individual" theory .....	363
Figure 21: A Summary of Research on GCK-based Problem Solving .....	365
